

ABSTRACT OF THE DISCLOSURE

The invention provides cleaning sheets for use in  
cleaning, e.g., various substrate-processing apparatus,  
systems for conveying exposure masks (reticles) in  
5 microfabrication, etc., and a method of cleaning these with  
the cleaning sheets. A cleaning sheet which comprises a  
sheet material comprising a thermoset resin layer having  
porosity and, formed on one side of the sheet material, a  
pressure-sensitive adhesive layer comprising a  
10 thermoplastic resin.
